Introduction

DreamArcade.io is a mobile-friendly platform that is focusing on building the best and most played eco-system on the Web. With our unique Web3 integration into our video games, players will be able to win, earn or spend $DA tokens inside our ecosystem.

But DreamArcade.io is not only focusing on providing games to its community, we are also eager to start bringing our games to other communities! Whether you're a player, influencer, project owner, or anything else, We have you covered! We're always looking to expand and provide the best Web3 gaming experience possible.

Profits

All profits made from the DreamArcade.io platform will be reinvested back into further development. That could be launching more games, buybacks of $DA tokens, or Airdrops. Our community will always benefit from remaining with us.

Partnerships

We will be building relationships with other communities and projects by providing access to our arcade game library whether they wish to host their profile with us or by hosting our games on their platforms. We can always come to some sort of agreement.

Ecosystem

Dream Arcade $DA token will be used across all our games as currency. The majority of $DA tokens will be locked and released to the eco-system to reflect the Demand. Everybody will be able to spend $DA tokens inside our ecosystem, Whether people bring in $DA tokens from the exchanges or earn them in our games or community.

Arcade Games

We will be focusing on building our library, full of user-friendly arcade games which everyone can enjoy. By integrating our unique Web3 crypto wallet connection into all our games, every player will be able to participate in our expanding ecosystem.

NFTs and Marketplace

With our new and unique Web3 integration inside our games, we will be launching NFTs that holders will be able to use in-game as Unique characters, skins, pets, or anything similar. Our NFTs will be always Limited edition to have a better value to our holders. Once we bring out an NFT it will be Mintable for a very limited time. When the timer runs out it will never come back. Therefore we will be implementing a Marketplace for the NFT holders to be able to trade them within the community.

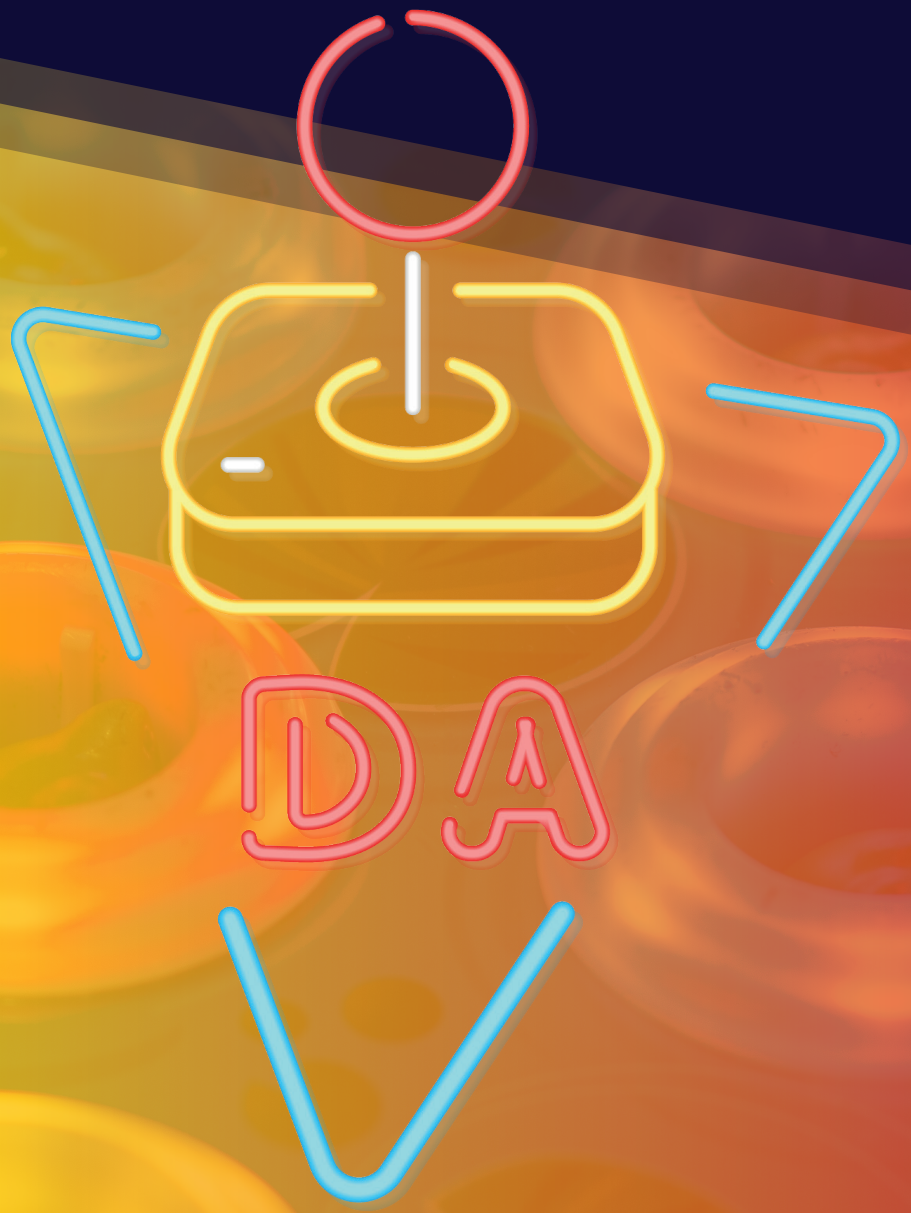
About Dream Arcade

DreamArcade.io has started as a utility platform for American Dream $ADREAM token in 2022 January, The idea behind it was to provide a use case for the $ADREAM token for its play to win games.

But due to unforeseen events American Dream project has ended. A community vote has been passed to start fresh but not with nothing! we already had a great utility that we can expand beyond what we have initially thought it could do. Over 1000+ $ADREAM holders have been migrated to the new project and contract, which is now DreamArcade $DA.

Note: American Dream Contract has been permanently disabled from trading as a security precaution.



Thank You!
